

**AMENDMENTS TO THE DRAWINGS**

The drawings are objected to as failing to comply with 37 C.F.R. § 1.84(p)(4) because reference characters “14” and “22” have both been used to designate a projection. Applicants assert that the objection is now moot given the amendment to Fig. 1 and the Specification.

The drawings are further objected to under 37 C.F.R. § 1.83(a). With respect to the casting-in, Applicants respectfully point out that it is clear from the specification that the electro-magnetic component may be enclosed within a container, and that the container may comprise a material wherein the electro-magnetic component is at least partly cast-in (*inter alia*, page 3, lines 8-10). Further it is specified that the projections may be provided at a surface of the container (*inter alia*, page 3, lines 8-10 and page 5, lines 21-24). Therefore, a person skilled in the art would not be in doubt as to what is actually cast-in.

Applicants respectfully request that the objection be withdrawn.

**REMARKS**

Claims 34-37, 40-44, and 74-80 are pending in the present application. Claims 1-33, 38, 39, and 45-73 have been canceled. Claims 34 and 74 are independent claims. Support for the amendment to claim 34 can be found, *inter alia*, in canceled claim 39 which the Examiner indicated as being allowable. Support for independent claim 74 may be found, *inter alia*, in claims 40 and 41 which the Examiner indicated as being allowable.

**Specification Objections**

The Specification is objected to because of informalities. Applicants submit that the objection is now moot given the Applicants' amendments to the specification.

**Drawing Objections**

Applicants submit that the drawing objection is now moot given the Applicants' amendments to the drawings.

**Claim Objections**

Claim 34 is objected to because of informalities. Applicants assert that the objection is now moot given the Applicants' amendment to claim 34.

**Claim Rejections - 35 USC §112**

Claim 40 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants respectfully traverse.

Applicants assert that the rejection is now moot given the amendment to claim 40 that removed the “in relation” language. Applicants assert that the amendment is clear on its face and that the Examiner should not find it difficult to understand the term “relative to” as it would be understood by one skilled in the art.

**Claim Rejection - 35 USC §102**

Claims 34-38 and 42-44 are rejected under 35 U.S.C. § 102(b) as being anticipated by Carlson et al. Applicants respectfully traverse.

Applicants submit that amended claim 34 is allowable at least because amended claim 34 now includes the features of claim 39 which the Examiner indicated as being allowable. Applicants respectfully request that the art grounds of rejection be withdrawn.

**Allowable Subject Matter**

Applicants thank the Examiner for recognizing the allowability of claims 39-41. Applicants submit that claim 74 is allowable at least because it

includes the features of claim 41 which the Examiner indicated as being allowable.

**CONCLUSION**

Accordingly, in view of the above amendments and remarks, reconsideration of the objections and rejections and allowance of each of remaining claims in connection with the present application is earnestly solicited.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact John A. Castellano at the telephone number of the undersigned below.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 08-0750 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17; particularly, extension of time fees.

Respectfully submitted,

HARNESS, DICKEY, & PIERCE, P.L.C.
